

SEPTIAN MEDIO

FRONTEND DEVELOPER

Pekanbaru, Indonesia | [linkedin.com/in/septianmedio](https://www.linkedin.com/in/septianmedio) | github.com/septianmedio

PROFESSIONAL SUMMARY

Frontend-focused developer building responsive, user-centered web experiences with HTML, CSS, and JavaScript. Hands-on project experience includes responsive layouts, UI implementation from Figma, Git/GitHub workflows, and practical business applications. Brings 9+ years of professional inventory-control experience in the power-generation industry, strengthening problem-solving, attention to detail, documentation, and cross-functional collaboration. Currently developing software engineering skills through KodingUp and seeking an entry-level Front End Developer role in a remote, collaborative team.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, Responsive Web Design, Flexbox, CSS Grid, Media Queries

Currently developing: TypeScript, React, Next.js, Tailwind CSS, Bootstrap

Tools & Workflow: Git, GitHub, VS Code, Browser Developer Tools, Figma, GitHub Pages, Vercel, Netlify

Additional: UI/UX Design, Design Thinking, debugging fundamentals, foundational web application concepts

SELECTED PROJECTS

Tentang Rasa Coffee & Bakery Website | Frontend Developer & UI/UX Designer

2026

- Designed and developed a responsive customer-facing website using HTML, CSS, and JavaScript, with layouts adapted for desktop, laptop, tablet, and mobile devices.
- Translated Figma designs into web interfaces using Flexbox for navigation, CSS Grid for media content, and media queries for responsive behavior.
- Applied Design Thinking to structure the Home, About, Menu, Our Media, and Contact experience around practical online coffee ordering; deployed the project with GitHub Pages.

MATRIX - Material Management & Tracking System | App Project

2026

- Developed a material-management application concept for warehouse operations, including login, dashboard, stock list, stock opname, item registration, asset opname, and QR-based material search.
- Designed role-based access and practical workflows around real inventory-control needs, connecting software problem-solving with operational experience.

SOFTWARE ENGINEERING TRAINING

KodingUp | Software Engineering Trainee

2026 - Present

- Practice JavaScript fundamentals, functions, objects, conditional logic, clean naming, code structure, and problem solving through progressively challenging assignments.
- Use Git and GitHub to revise code, push changes, and maintain project change history; apply code-review feedback to improve readability and maintainability.

PROFESSIONAL EXPERIENCE

PT PLN Nusantara Power - UP Tenayan | Inventory Control

9+ years

- Manage and analyze material inventory data supporting power-plant maintenance and operational requirements, including material availability and replenishment needs.
- Coordinate across inventory, warehouse, procurement, engineering, and maintenance stakeholders to resolve material issues and support operational continuity.
- Prepare documentation, monitor inventory performance, and investigate discrepancies between physical material conditions and system records.
- Apply structured problem solving, accuracy, and process discipline in a safety- and reliability-critical industrial environment.

EDUCATION & TRAINING

SMA Negeri 10 Pekanbaru | Graduated 2014

UI/UX Design Bootcamp - Special Skill Indonesia | June 2026
